REGENERATIVE PROJECT.

Our most significant purpose is to have a sustainable project with a clear goal: To restore the fauna and flora of our property.
65 Hectare (160Acres): 95% for regeneration of the native forest, 4% Organic Orchard and Vegetable gardens, less than 1% Hotel infrastructure.
(We are part of the private natural reserve of the nation, working together with the institutional establishments and ecological programs.)

Home

The Condor Nest is at 2200 meters above sea level in the department of Caldas in the Andean part of the coffee region. 17 km away from Villamaría, 24 km From Manizales city, the capital of the department, 21 km from MZL Airport(1:10 hours approx.). 75km from PEI international Airport (2:30 hours approx.)

Hotspots:

Los Nevados (Los Nevados National Park).

Coffee Region (Coffee Farms, Historic Towns)

Thermal Springs (5 different places)

Near Cities:

Manizales, Caldas. 24km (1:15 h)

Pereira, Risaralda. 65 km (2:15 h)

Armenia, Quindío. 100 km (3:30 h)

HOW TO ARRIVE?

Our facilities are accessible from our base station, either by walking, horseback on trails, or through our aerial cable gondola.

HOW TO ARRIVE?

We have two different trails to arrive; each one has an estimated time of 40 minutes to 1 hour depending on the visitors' skills. The trip in the gondola takes 7 minutes and crosses the canyon of Molino's river above the canopy of the forest.

A UNIQUE ENTRANCE.

OUR FACILITIES.

6 Rooms, 5 tents each one has a maximum capacity of 4 pax. + 1 Villa with a maximum capacity of 5 pax. And 1 tour leader cabin for 2pax.
A total capacity of 25 pax + 2 tour leader cabins.
A Spa+Yoga Center and Multi functional space.

Home

SUSTAINABLE ARCHITECTURE.

For us as architects, the main goal was to create a project that respects the context and environment surrounding us. We try to use recycled materials and green certifies supplies for the infrastructure and the furniture.

Home

GARDENS AND LANDSCAPE.

We try to reinterpret the farmers or country gardens, selecting several species of flowers and plants that are perfect for feeding the hummingbirds and butterflies.

Home

THE TENTS.

Each tent or room has 83 square meters (270sq ft.), an independent private bathroom connected by a covert bridge, and two terraces, one from the hummingbird gardens and another to the Condors canyon.

We designed and constructed the tents using a 100% cotton Spanish fabric used for sailboat sails. That makes the interior temperature nice and comfortable with the climate variations that can go from 24°C in the mid-day to 12°C at night. We also have chimneys in if tents and all the amenities to have a warm night.

THE ROOMS.

Each room is divided into five main parts:

The entrance (Hummingbird Terrace) has two hammocks and a coffee table "it's the best spot to photograph the butterflies and hummingbirds,

A Hall or living room where you can find a sofa, a couple of butterfly chairs, a working table, and a coffee and tea station; This space has the flexibility to be converted into a second area for twin beds.

The main room has a king-size bed, two night tables, a rack for your clothes, and a luggage station, and a unique chimney that works with special aromatic wood bricks. "If you're lucky, you can see the Andean Condor from your bed passing through your eyesight."

Twin beds accommodation up to 4 bed twin beds per tent.

Condors terrace as the entrance terrace this front deck has a dining table and pair of hammocks so you can contemplate the landscape or wait until the condors appear.

The Bathroom has a unique space illuminated by natural light, has an interior garden, and the shower has an extraordinary view of the Condors canyon; it has hot water and all the amenities of a 5-star hotel.

Walkways have been constructed elevated from the ground. For two main reasons: First, that the fauna can pass below it without any problems. The second is that the third-old aged, reduced mobility people can walk from the rooms to the main building and the different terraces easily and securely.

MAIN BUILDING AND DINING ROOM.

The main building accommodates the front check, dining space, and kitchen. It also has a solar panel system and uses the roofs to collect the rainwater to irrigate the orchards and the gardens.

THE GASTRONOMY.

We include three main meals, (full board). Many ingredients come from **farm to food** from our organic orchards and local suppliers to secure you a fresh and healthy meal. Our gastronomy is based on international food fusion with local ingredients.

THE GASTRONOMY.

Our chef creates custom-designed menus featuring locally sourced ingredients, with options for vegans and vegetarians.

SPA AND YOGA CENTER.

We are in the process of developing a Spa and Yoga center related to the organic orchards and avocado plantation, it will have 7 different unique spaces for the relaxation and development of different treatments and experiences connected to the 5 natural elements.

INTERPRETATION CENTER.

We are creating an Interpretation Center that celebrates the rich diversity of the local wildlife and plant life. As we finalize the museography design and installation, This space will serve as a peaceful and rejuvenating hammock and rest area.

THE VIEW.
We have one of the gorgeous 360° views in the mornings the sunrise shows up in the background of El Ruiz Snow mountain, at mid-day, the condors fly near the hotel during lunchtime, and we have one of the most beautiful sunsets on the afternoons.

At night when we are at full moon days, you can walk through peripheral paths without a lamp, and on the new moon, times are a perfect spot for stargazing or taking incredible photos of the Milkyway and falling stars.

When the weather is cloudy, or we are on a rainy day, three itinerant waterfalls appear in front of us in the condor's canyon; they only stay for few hours and then disappear.

EXPERIENCE AND ACTIVITIES.

Memo Gómez
Nature Photography

Rob

We have birdwatching and fauna photography, with more than 235 species register on our list; terraces and observation towers.
